The Fraction Song

A fraction, a fraction, addition or subtraction,
you need a common denominator before you work your fraction.

A fraction, a fraction, multiplication's a type of fraction.
Multiply, straight across the top and bottom of your fraction.

A fraction, a fraction, division is a type of fraction.
It's common to multiply, by flipping your second fraction.

Three Step Chants:

When adding and subtracting fractions, the steps are:

1. Shape—write fractions with common denominators.
2. Operate—add or subtract numerators only.
3. Simplify—reduce or convert where possible.

Comments from **Providence Classical Christian School**: This was written by Tami Gamble for the fifth-grade classroom.
